A handful of stocks. \$3 trillion. 813% average gains.

Preheader Text

Your free list of the six top stocks is here ...

[View in Browser](#)

Dear friend,

Since 2016, a tiny sector of the market has been handing investors massive gains.

In fact, the 24 top stocks in this sector averaged gains of 813%.

That's enough to multiply your investment more than nine times over, **or turn every \$10,000 invested into \$91,300**. Even better, the average holding time was just ten months.

Now, respected research firm, Gartner Inc., says this sector is about to receive a \$3 trillion stimulus. And as this money pours in, stocks will soar even higher.

This is why I've prepared an urgent, [free video](#). 488 (26.2%) In this eye-opening presentation ...

- I'll give you three surprising reasons why stocks in this sector are already generating gains of up to 14,000% for early investors ...
- I'll walk you through seven reasons why I'm convinced Gartner Inc. is 100% correct: Why these companies are about to get a \$3 trillion "gift" from the world's governments, companies and consumers.
- And I will NAME the half-dozen stocks that are still affordable — but climbing rapidly.

If you [get in early](#), 920 (22.5%) to make serious money. So, it's critical that you get this information — and the names of these six stocks — right away.

[Click here](#) 885 (47.5%) v.

Sincerely,

Tony Sagami

Six stocks that get you into a \$3 trillion growth industry

Preheader Text

We've already seen gains as high as 14,727%

[View in Browser](#)

Fellow Investor,

One, tiny sector is about to receive a \$3 trillion stimulus.

The last time something similar happened was in 2008 and 2009, when the U.S. Treasury and Federal Reserve pumped \$3 trillion dollars into the economy to stop the carnage.

The result: Nearly 4,000 stocks soared by an average of 327%.

Now, according to the globally respected research firm, Gartner Inc., \$3 trillion is about to be dropped on a handful of tiny companies. And this cash bomb will send stocks soaring.

I name six of these companies in my new video. You can watch it FREE by [clicking here](#).

1,466 (42.9%)

In this eye-opening presentation ...

I tell you why skyrocketing growth for these companies is virtually guaranteed.

Why some stocks are already generating gains of up to 14,000% for early investors.

And more importantly, why these [six stocks](#) are still affordable — but climbing rapidly.

1,155 (33.8%)

If you're serious about building wealth, this could be critical information for you.

VC firms invested \$3.1 billion in this sector last year

Preheader Text

What do they know that you don't?

[View in Browser](#)

Fellow Investor,

America's savviest venture capital firms are rushing to invest in a tiny, expanding sector. They invested a record \$3.1 billion last year, nearly four times more than in 2010.

Why?

Because according to research firm, Gartner Inc., \$3 trillion dollars is about to be spent in this sector, with most of it going to a handful of companies.

To find out why, [click here](#).

770 (47.6%)

Stocks for some of these companies are already soaring. In fact, of the 24 top stocks in this sector ...

- TEN were up 49% to 99.6% — (some posted those gains in as few as 4 days) ...
- FIVE more than doubled by posting gains of 103% to 178% ...
- Six tripled and nearly quintupled, soaring up to 389% ...
- Two posted gains of 733% or better, enough to multiply your money more than eight times ...
- While the top performer was up a mind-blowing 14,727%.

I tell you who these companies are and why their skyrocketing growth is nearly guaranteed in my [new, free video](#).

352 (21.7%)

More importantly, I list the six top stocks that you can still buy at an affordable price — for now.

Venture capitalists know this is a serious opportunity to build wealth. And if you're serious about building your money, I urge you to [watch this video now](#).

The first line of these stocks soared up to 68,719%. But now ...

Preheader Text

The new line is set to grow as much – and faster

[View in Browser](#)

Fellow Investor,

In 1978, the first line of defense stocks was introduced to the investing public. If you had jumped in then, you'd be rich today.

For example:

- A \$2,500 investment in General Dynamics would have grown to \$875,000 today.
- The same investment in United Technologies would now be worth a cool \$1 million.
- While a \$2,500 grubstake in Boeing skyrocketed to \$1.725 million.

Now, the [new line of defense companies](#) is here. And they are growing much faster than [the 491 \(16.4%\)](#) ever did.

Their stocks tell the story: Last year, the average gain for these new defense stocks was 813%. The average holding time was 10 months. One stock exploded 14,727% in a matter of months.

And in the first quarter of 2017, these stocks walloped the S&P500 by as much as 53 to 1.

I give you all the details in my new video, which you can watch free by [clicking here](#).

[296 \(12.1%\)](#)

I tell you why skyrocketing growth for this new line of companies is virtually guaranteed. And why some stocks are already generating gains of nearly 15,000% for early investors.

More importantly, I list [six top stocks](#) that are still affordable – but climbing rapidly. [1,063 \(43.4%\)](#)

If you missed the first line of stocks, your second chance is here. But the time to move is now, while the opportunity is young.

[Click this link](#) now to get the details.

[639 \(26.1%\)](#)

Hacked? Here's your BEST revenge ...

Preheader Text

Gains as high as 14,727% by stopping hackers in their tracks

[View in Browser](#)

Fellow Investor,

If you or your loved ones have been hacked, you know this already: Cybercriminals are wreaking havoc.

Data breaches hit an all time high in 2016. And hackers are working overtime to find new ways to get their hands on YOUR private information.

That's why the research firm, Gartner Inc., says the U.S. government, plus millions of companies worldwide, will soon spend THREE TRILLION DOLLARS on the hardware and software to keep our precious data safe.

The thing is, that \$3 trillion will be spent with a handful of cybersecurity firms. And this cash bomb will send their stock prices soaring.

My [new video](#) gives you the details ...

153 (9.1%)

- I'll give you three surprising reasons why select cybersecurity stocks are already generating gains of up to 14,000% for early investors ...

- I'll walk you through seven reasons why I'm convinced that Gartner Inc. is 100% correct: Why these companies are about to get a \$3 trillion "gift" from the world's governments, companies and consumers.

- And I will NAME "The Cybersecurity Six" — The half-dozen stocks that are perfectly positioned to multiply your money in the years to come ...

If you [get in now](#), you stand to make a lot of money.

225 (13.4%)

Because in 2016, the average gain among the top cybersecurity companies was 813% — with an average holding period of 10 months.

That's enough to **turn every \$10,000 invested into \$91,300.**

But don't wait. My six top picks are affordable now, but they won't be for long.

You can get their names by [clicking here](#).
